

Project Design Phase-II Technology Architecture

| | |
|---------------|------------------------|
| Date | 14 October 2022 |
| Team ID | PNT2022TMID08565 |
| Project Name | Web Phishing Detection |
| Maximum Marks | 4 Marks |

Technical Architecture:

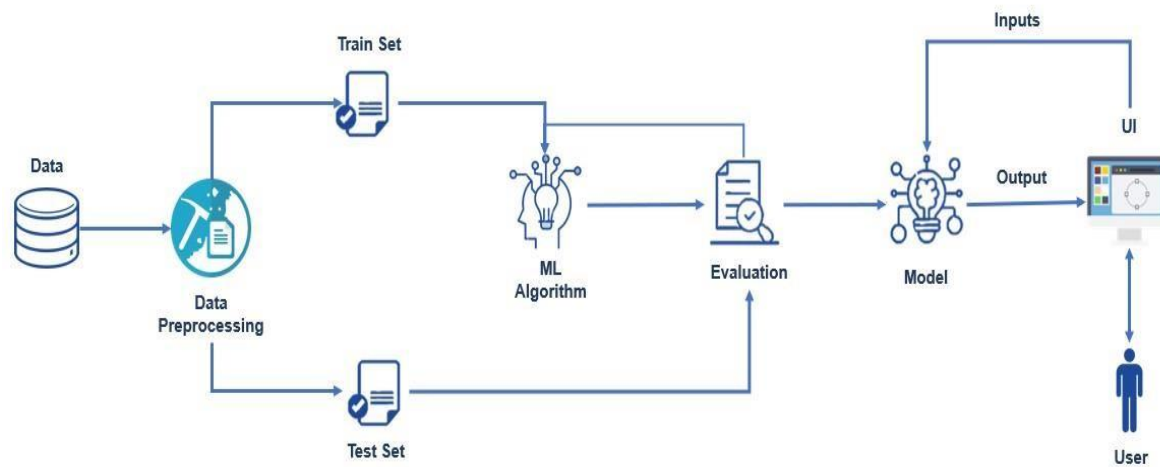

Table-1:Components & Technologies:

| S.No | Component | Description | Technology |
|------|---------------------------------|---|--|
| 1. | Application Logic-1 | Logic for a process in the application | Python |
| 2. | Application Logic-2 | Logic for a process in the application | IBM Watson STT service |
| 3. | Application Logic-3 | Logic for a process in the application | IBM Watson Assistant |
| 4. | Database | Data Type, Configurations etc. | MySQL, NoSQL, etc. |
| 5. | Cloud Database | Database Service on Cloud | IBM DB2, IBM Cloud ant etc. |
| 6. | File Storage | File storage requirements | IBM Block Storage or Other Storage Service or Local Filesystem |
| 7. | Machine Learning Model | Purpose of Machine Learning Model | Object Recognition Model, etc. |
| 8. | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration : | Local, Cloud Foundry, Kubernetes, etc. |

Table-2: Application Characteristics:

| <i>S.No</i> | <i>Characteristics</i> | <i>Description</i> | <i>Technology</i> |
|--------------------|-------------------------------|---|---|
| 1. | Open-Source Frameworks | Open-source phishing framework that makes it easy to test your organization's exposure to phishing. | Go phish, Speed Phish Framework (SPF), King Phisher, etc. |
| 2. | Security Implementations | Security / access controls implemented, use of firewalls etc. | e.g. anti-phishing protection and anti-spam software etc. |

| <i>S.No</i> | <i>Characteristics</i> | <i>Description</i> | <i>Technology</i> |
|--------------------|-------------------------------|---|---|
| 3. | Scalable Architecture | Scalability detection and Isolation of phishing. | Response time, Throughput, CPU and network usages, etc. |
| 4. | Performance | Design consideration for the performance of the application and methods for detecting phishing attacks. | Blacklists/whitelists, Natural language Processing |
